

FABTEK AERO

Fabtek Horizontal Elevated Boiler Feed Systems are designed to allow for maximum NPSHA to the Boiler Feed Pumps to help eliminate Cavitation and Prolong Pump Life. Receivers are mounted to Heavy Duty Angle or Square Tube Carbon Steel Stands and Coated with Industrial Grade High Temperature Black Paint. Many different Pump options are available to meet just about any performance requirement. Custom opening locations and stand heights can easily be provided to meet job site requirements.

HORIZONTAL ELEVATED BOILER FEED SYSTEMS

STAINLESS STEEL

- Systems are constructed of high quality 304L SS
- Tanks are warranted for 20 years against failure due to corrosion
- Add Stainless Steel Pumps, Piping & Accessories for a complete Stainless Steel Package

CARBON STEEL

- Standard Construction is Commercial Quality ASTM A-36 Carbon Steel
- Carbon Steel Tanks are Coated with Industrial Grade Rust Resistant Paint
